

# Why Choose a Web-based Application ?

**NETHRIS**<sup>®</sup>

A Web-based application is an application delivered to users from a Web server through the Internet.

The numerous benefits of this increasingly popular type of application make Web-based applications the obvious choice. Here are some good reasons to choose a Web-based application...

- **No installation.** All you need is a Web browser! No need to install special equipment or software on your workstations, no technical resources required;
- **Instant use.** Access our Web-based applications just like you do any other Web site. Additionally, you always have the latest version at no extra cost;
- **Accessibility and mobility.** The data is available in real-time 24 hours a day, 7 days a week, 365 days a year;
- **Outside maintenance.** We are fully in charge of the application's hosting and maintenance. Your data is archived daily and kept on servers equipped with firewalls and located in rooms with 24/7 surveillance. This way, you benefit from leading-edge technologies, data infrastructures and extremely robust databases for a fraction of the cost;
- **Multiple companies, multiple users.** Whether you have ten, a hundred, or a thousand users, employees or managers, everyone can access the application from a single point;
- **Cost control.** Cut out printing costs, thanks to the paperless work environment. Document archiving and distribution (reports and pay slips) uses Adobe<sup>®</sup> PDF files;
- **Modular cost structure.** You can count on a modular and predefined cost structure. Pay only for what you truly need.

## For More Information
